VEGETABLES -- PROCESSING

ANNUAL SUMMARY

1960

Production of the 10 principal vegetables for processing in 1960 was 6 percent more than last year and 11 percent above average, the Crop Reporting Board announced today. This year's production of 7.31 million tons compares with 6.91 million tons produced last year and the average of 6.59 million tons for the preceding 10-year period. It is 13 percent less than the 1956 record large production of 8.38 million tons.

The production of asparagus for processing in 1960 was 6 percent larger than in 1959 and 16 percent above average. Lima bean production increased 24 percent over last year. The tonnage frozen was up 28 percent and that canned was 16 percent larger. The volume of snap beans processed set another record and was 11 percent above last year. Six percent more snap beans were canned and 27 percent more were frozen. Production of beets for canning continued its downward trend with a further reduction of 4 percent. 39 percent more cabbage was used for sauerkraut than from last year's small crop. Sweet corn production was 12 percent less this year than last. However, 16 percent more corn was frozen, but the amount canned was down 17 percent. A record high yield of 146 bushels of cucumbers per acre on 5 percent fewer acres resulted in approximately the same quantity of pickles as last year. There were 8 percent less green peas processed. Production for freezing and canning was down 10 and 7 percent respectively. Spinach production was only 1 percent under last year. A 7 percent smaller spring crop more than offset larger winter and fall spinach crops. Tomato production was 14 percent higher this year than last. Better yields in all major producing States were responsible for the larger production.

The value of these vegetables used for processing is 285.4 million dollars. This is 10 percent higher than last year and 8 percent more than average.

The rank of the leading States growing vegetables for processing is shown below:

Rank	Acreage		Production		Value	
	State	Percent of total	State	Percent of total	State	Percent of total
1	California	15.1	California	34.2	California	28.2
2	Wisconsin	14.3	Wisconsin	7.6	Wisconsin	6.9
3	Minnesota	8.9	Ohio	5.8	Oregon	6.5
4	Illinois	7.2	New York	5.7	New York	6.4
5	Washington	7.2	Illinois	5.6	New Jersey	6.0

This report was made possible by the cooperation of vegetable processors who provided basic statistics concerning their operations. Supplementary information was supplied by State Agricultural Statisticians and cooperating agencies.

Summary of harvested acreage, production and value of principal processing vegetables,
